4.

The Printing Queue prints notes in multiples of 6.
[For example, if you want to print 15 notes, 2 pages (12 notes) will print & the 3 remaining notes will be sent to the print queue.]

5.

If Printing is set to 'ON' (default), notes that are newly added to the Note Wall will populate the Printing Queue until they reach 6 notes & then they will auto-print.

6.

To prevent newly added notes from being auto-printed, toggle Printing 'ON' to 'OFF'. This will turn off auto-note printing but will not turn off printing.

7.

Because notes print in batches of 6, if you want to force the printing queue to print before it's reached it's 6 note capacity, select "PRINT QUEUE".
